## Installing 15 Degree Plate

- Install $15^{\circ}$ Plate as shown below. Both trays must be removed before installing new $15^{\circ}$ plate.
- Tools required (not included):
- $9 / 16^{\prime \prime}$ socket to remove/install tray fasteners.
- $3 / 16^{\prime \prime}$ Allen Wrench to remove/install $15^{\circ}$ plate fasteners.

Note: $15^{\circ}$ plate fasteners may require impact quality tool to remove.

Note: Periodically tighten fasteners to insure secure connection.
